*Brush surface equals NO Scarring, Marring or Scratching*

### TYPICAL APPLICATIONS

- **Convey**
- **Feed/Orient/Meter**
- **Accumulate**

| Vibratory Bowl Lining | Convey | Feed/Orient/Meter | Accumulate |

www. cds-lipe.com
20° Fiber Brush on the surface of vibratory conveyors, linear feeders, accumulators and bowl feeders can move parts more quickly, more gently and with less noise then rotary turntables, belts of other feeder surfaces

Fragile or polished parts move with less chance of breakage or surface damage

Accumulate green parts with minimal or no damage.

Resin-filled backing helps to dampen noise. A typical Dyna-Slide operates at less then 65 dba meaning a quieter work area. Rugged, replaceable surface means longer equipment life, even with heavy parts.
**Brushlon - Wet or Dry Applications**

**Nylon Short Trim Products:**
- **320B, 312B, 331B**
  - **Characteristics:**
    - Very high density nylon fiber in straight or 20° orientation
    - Green
    - Flexible urethane type for high tensile, low stretch
  - **Typical Applications:**
    - Sound deadening
    - Vibratory bowl feeder lining
    - Vibratory conveying
    - Carrier roll covering
    - OEM applications

**Polypropylene Fiber Products:**
- **720B, 721B, 730B, 731B**
  - **Characteristics:**
    - Polypropylene fiber in straight or 20° orientation unaffected by most chemicals
    - Most inexpensive Brushlon form
    - Black
    - Flexible urethane type for high tensile, low stretch
  - **Typical Applications:**
    - Vibratory bowl feeder lining
    - Vibratory conveying
    - Wood panel dusting
    - Conveyor belt cleaning
    - Scrub brushes
    - OEM applications

**VELCRO ATTACHMENT STYLE**
